

GFG Alliance

Advanced engineering solutions for industry

One of the **Largest** private engineering companies in the UK supplying components to every car manufacturer

Capabilities from **design and manufacturing** to complete **product solutions**

Solutions cover **ICE, EV and autonomous vehicles**

Supplier to most **major motorport racing series globally**

Every 8 min

a car in the UK rolls out with **one of our components on it**

Tier 1, 2 & 3 supplier

to all major European OEMs

The company supplies

46 million pressed components per annum

Designs and manufactures

19,000

specialist vehicles per annum

Only manufacturer of aluminium wheels in France

GFG Alliance's engineering arm delivers a wide spectrum of solutions, adding value to steel and aluminium production.

The GFG Alliance has international capabilities for the automotive and engineered industries with sites located in the United Kingdom, France and the UAE. It combines the expertise of 18 businesses across 20 locations and delivers a range of products and services to customers mainly in the automotive, aerospace, defence and construction sectors.

These companies focus on the design, manufacture and distribution of engineered products and services using steel, aluminium, composite materials and exotic metals. Products range from drive-by-wire solutions and racing

grade performance brakes and to anti-vibration mounts for defence applications.

The GFG Alliance is a major supplier to all domestic and global automotive original equipment manufacturers, operating as a tier one partner into the supply chain.

The Alliance has a wide ranging product and services offering to the automotive and off-road sectors which includes powertrain, braking and control electronics, as well as engineering, testing and advanced vehicle solutions, provided to customers such as JLR, Ford, Renault, Nissan, Peugeot, and many others.
