#1 agricultural steel fence brand in the USA

The GFG Alliance has an integrated steel offering - ranging from liquid steel made from recycled and raw materials through to high-value precision engineered products and associated services, sold around the world.

The GFG Alliance has global capabilities in steel manufacturing. Its comprehensive product range includes semis, long and flat products, including coated steels. These are manufactured in a variety of grades and finishes to comply with national and international quality certified standards and meet stringent customer specifications.

Located across the UK, Australia, Europe, India, China, South Africa, Latin America and the USA, the Alliance's furnaces, mills, service centres and distribution sites serve demanding sectors such as automotive and aerospace, oil and gas, and construction.
